

Taleem ul Quran Portal - Complete System Specification

Project Overview

Platform: Web-based application (responsive design)

Purpose: Online Quran teaching management system

User Roles: Admin/Owner, HOD, Teachers, Students, Schedulers, HR, Customer Service Rep, Monitoring Team

1. CUSTOMER SERVICE REPRESENTATIVE (CSR) MODULE

Purpose

First point of contact for new customers. Handles demo class requests.

Key Screens Needed

1.1 Demo Request Form

Fields to collect:

- Guardian Name (text input)
- Student Name (text input)
- Student Age (number input)
- Student Level (dropdown: Beginner, Intermediate, Advanced)
- WhatsApp Number (phone input with country code)
- Preferred Time Slot (time picker)
- Preferred Days (checkbox: Mon-Thu OR Sat-Sun)

Actions:

- Submit button → sends info to Scheduler
- View Pending Demos button → see list of demos waiting to be scheduled

1.2 Demo Dashboard

Display:

- List of all demos (Pending, Scheduled, Completed, Cancelled)
- Status badges with color coding
- Notification bar at top showing "X demos need scheduling"
- Filter by date/status

UI Notes:

- Clean table view with search functionality
 - Each row shows: Student Name, Guardian, Date Submitted, Status
 - Click row to see full details
-

2. SCHEDULER MODULE

Purpose

Receives demo requests and assigns teachers + time slots. Manages all class scheduling.

Key Screens Needed

2.1 Today's Schedule View

Display:

- Time-based grid/calendar showing all classes for today (08:00 - 20:00)
- Each class block shows:
 - Teacher Name
 - Student Name
 - Class Time (08:00 - 08:30 PM format)
 - Status indicator (Ongoing, Completed, Cancelled)

Stats at top:

- Total classes today: [number]
- Total makeup classes today: [number]
- Ongoing classes: [number]

2.2 Demo Assignment Screen

Shows:

- List of unscheduled demo requests (from CSR)
- Available teachers dropdown
- Date picker
- Time slot selector
- Assign button

After assignment:

- Auto-notification sent to student & teacher

2.3 Weekly Schedule Grid**Display:**

- Full week view (Mon-Sun)
- Separate tabs for "Weekday Package" and "Weekend Package"
- Drag-and-drop functionality to reschedule classes
- Color coding for different teachers

2.4 Makeup Class Manager**Shows:**

- List of students requesting makeup classes
- Available slots
- Assign makeup class button
- History of makeup classes

UI Notes:

- Notification bell icon showing pending makeup requests
-

3. STUDENT PORTAL**Purpose**

Students view their schedule, progress, syllabus, and can submit complaints.

Key Screens Needed**3.1 Student Dashboard (Home Screen)****Display:**

- Welcome message with student name
- Today's class card (if scheduled):
 - Teacher name
 - Time
 - Subject/Topic

- "Mark Present" button (appears only at class time)
- Quick stats:
 - Total lessons completed
 - Current level/progress
 - Next class

3.2 My Schedule

Display:

- Calendar view of all scheduled classes
- Filter by week/month
- Shows: Regular classes + Makeup classes (different color)
- Class details on hover/click

3.3 Progress Report

Display:

- Total lessons taken since joining
- Current syllabus progress (percentage bar)
- Last test date and score
- Monthly breakdown of lessons
- Graph showing progress over time

3.4 Syllabus View

Display:

- List of topics/lessons
- Checkmark for completed topics
- Current topic highlighted
- Upcoming topics grayed out

3.5 Attendance History

Display:

- Table showing:
 - Date
 - Class time

- Attendance status (Present/Absent/Late)
- Teacher name

3.6 Request Makeup Class

Form:

- Select date from available slots
- Select time
- Reason (optional text)
- Submit button

3.7 Submit Complaint

Form:

- Issue type dropdown (Teacher camera off, Not correcting mistakes, Misbehavior, Technical issues, Other)
- Description text area
- Submit button

UI Notes:

- Complaint goes to Monitoring Team + HOD
-

4. TEACHER PORTAL

Purpose

Teachers manage their classes, mark attendance, view student progress, and handle syllabus.

Key Screens Needed

4.1 Teacher Dashboard

Display:

- Today's schedule (list of classes with times)
- Number of classes today
- Quick actions:
 - Mark Attendance
 - View Student List
 - Add Progress Note

4.2 My Students List

Display:

- Table showing all assigned students:
 - Student Name
 - Guardian Name & Contact
 - Class Days & Time
 - Current Level
 - Last Test Date
 - Progress Status
- Search and filter options
- Click student row to see detailed view

4.3 Student Detail View

Display:

- Full student profile
- Complete progress history
- Attendance record
- Test scores
- Notes section

4.4 Mark Attendance Screen

Display:

- List of today's classes
- Each class has:
 - Student name
 - Scheduled time
 - "Mark Present" button (only appears at class time or 5 min before)

Rules:

- If teacher marks present AFTER 5 minutes of class start = Late/Penalty
- If doesn't mark at all = Absent

UI Notes:

- Timer showing countdown to class start
- Red warning if running late
- Auto-mark as absent if not clicked

4.5 Syllabus Management

Display:

- List of all syllabus topics
- Add New Topic button
- Remove/Edit options for each topic
- Assign topic to specific students

4.6 Progress Tracking

Form:

- Select student dropdown
- Select lesson/topic dropdown
- Mark as completed checkbox
- Add notes text area
- Save button

4.7 My Schedule

Display:

- Weekly calendar view
 - All classes color-coded
 - Makeup classes shown separately
-

5. HOD (HEAD OF DEPARTMENT) PORTAL

Purpose

Oversees entire operation - teachers, students, complaints, scheduling.

Key Screens Needed

5.1 HOD Dashboard

Display:

- Total students count
- Total teachers count
- Pending complaints badge
- Recent activity feed
- Quick links to all sections

5.2 All Students Overview

Display:

- Complete list of all students
- Progress indicators
- Last test dates
- Filter by level/status
- Export to Excel button

5.3 All Teachers Overview

Display:

- List of all teachers:
 - Name
 - Contact
 - Shift/Timing
 - Education/Level
 - Number of students
 - Attendance percentage
 - Performance rating
- Add New Teacher button
- Remove Teacher option

5.4 Teacher Performance Dashboard

Display:

- Graph showing teacher attendance over time
- Number of absentees
- Student feedback ratings
- Complaints received

5.5 Complaints Manager

Display:

- List of all complaints (from students & monitoring team):
 - Complaint type
 - From: Student/Monitor
 - Against: Teacher name
 - Date
 - Status (Pending, Resolved, Escalated)
- Click to see full details and add resolution notes

5.6 Syllabus Master Control

Display:

- Full syllabus library
- Add/Edit/Remove topics
- Assign syllabus to classes

5.7 Scheduling Access

Display:

- Same view as Scheduler module
 - Can override and make changes
 - See pending student complaints related to scheduling
-

6. HR MODULE

Purpose

Handles teacher attendance, leave management, salary generation.

Key Screens Needed

6.1 HR Dashboard

Display:

- Total teachers count
- Present today count

- Absent today count
- Leave requests pending
- Salary slips pending

6.2 Daily Attendance Report

Display:

- Table showing today's attendance:
 - Teacher Name
 - Status (Present/Absent/Late/Leave)
 - Time marked
 - Number of classes conducted
- Export to PDF/Excel button

6.3 Monthly Attendance Report

Display:

- Calendar view for selected month
- Each teacher's attendance marked
- Summary stats:
 - Total working days
 - Total present days
 - Total absences
 - Total leaves
- Generate Report button

6.4 Leave Management

Display:

- List of leave requests:
 - Teacher Name
 - Leave Type (With Permission, Without Permission, Medical/Injury)
 - Date Range
 - Status (Approved/Rejected/Pending)
- Approve/Reject buttons

6.5 Complaints Record

Display:

- All complaints related to teachers
- Organized by teacher
- Used for salary/performance evaluation

6.6 Salary Slip Generator**Process:**

- Select teacher dropdown
- Select month
- Auto-calculates:
 - Total classes conducted
 - Total attendance days
 - Deductions (absences, late marks)
 - Final amount
- Generate & Send Salary Slip button

UI Notes:

- Preview before sending
 - Email to teacher automatically
 - Save to records
-

7. MONITORING TEAM MODULE**Purpose**

Quality control - watches classes and reports issues.

Key Screens Needed**7.1 Active Classes Monitor****Display:**

- List of ongoing classes
- Join/Watch Class button for each
- Quick report button

7.2 Submit Quality Report/Complaint

Form:

- Class details (auto-filled)
- Issue Type dropdown:
 - Teacher camera off
 - Teacher not correcting mistakes
 - Student misbehaving
 - Teacher misbehaving
 - Student not properly set up
 - Other
- Severity (Low, Medium, High)
- Description text area
- Evidence/Screenshot upload
- Submit button

Action:

- Report sent to HOD + Scheduler immediately
- Notification triggered

7.3 Past Reports

Display:

- History of all reports submitted
 - Status tracking (Pending, Under Review, Resolved)
 - Filter by date/teacher/issue type
-

8. ADMIN/OWNER MODULE

Purpose

Full system access. Manages all users and has overview of everything.

Key Screens Needed

8.1 Admin Dashboard

Display:

- Total system stats:
 - Total Students
 - Total Teachers
 - Total Demo Requests
 - Total Revenue
 - Active Classes Now
- System health indicators
- Quick links to all modules

8.2 User Management

Display:

- List of all users by role
- Add New User button
- Remove/Edit users
- Assign roles/permissions

8.3 System Settings

- Configure class timings
- Set attendance rules
- Configure penalty rules
- Email/notification settings
- Package settings (Weekday/Weekend)

8.4 Reports & Analytics

- Revenue reports
 - Student enrollment trends
 - Teacher performance
 - Attendance analytics
 - Export all data
-

ATTENDANCE SYSTEM - DETAILED FLOW

How It Works

Teacher Side:

1. Teacher logs in
2. Goes to "Mark Attendance" section
3. Sees today's classes with scheduled times
4. "Mark Present" button becomes active at class start time (e.g., 08:00 PM)
5. Teacher clicks "Mark Present" when class starts
6. System records timestamp

Timing Rules:

- **On Time:** Marked present between scheduled time and +5 minutes
- **Late:** Marked present after 5 minutes but before end of class = Late/Penalty recorded
- **Absent:** If teacher never clicks button = Automatically marked absent

Student Side:

- Student also has "Mark Present" button on their side
- Both teacher AND student marking attendance provides double verification
- If only teacher marks but student doesn't = Flag for review
- If only student marks but teacher doesn't = Teacher absent

UI Design Notes for Attendance

- **Button states:**
 - Disabled (gray) - before class time
 - Active (green) - during class time window
 - Late (orange) - after 5 minutes
 - Missed (red) - after class ended
 - Timer countdown showing time until class starts
 - Auto-refresh to enable buttons at correct time
-

GENERAL UI/UX GUIDELINES FOR DESIGNER

Color Scheme Suggestions

- **Primary Color:** Deep blue or green (Islamic/educational feel)
- **Success:** Green (present, completed)
- **Warning:** Orange (late, pending)
- **Danger:** Red (absent, complaints)
- **Neutral:** Gray (disabled, inactive)

Navigation Structure

- **Sidebar Navigation** for each portal type
- **Top Bar:** User profile, notifications, logout
- **Breadcrumbs** for deep navigation
- **Responsive Design:** Must work on tablets and mobile browsers

Common UI Elements Needed

1. **Dashboard Cards:** Stats with icons
2. **Data Tables:** Sortable, searchable, paginated
3. **Calendar Components:** For scheduling
4. **Time Pickers:** For class times
5. **Notification System:** Toast messages for success/errors
6. **Modal Windows:** For forms and confirmations
7. **Dropdown Menus:** For selections
8. **Status Badges:** Color-coded pills showing status
9. **Progress Bars:** For syllabus completion
10. **Tabs:** For switching between views

Accessibility Requirements

- Clear contrast ratios
- Readable fonts (minimum 14px)
- Clear button labels
- Loading states for all actions
- Error messages that are helpful

Notification System

- **Bell icon** in top bar showing unread count
- Notifications for:

- New demo requests (CSR, Scheduler)
- Class starting soon (Teacher, Student)
- Complaints received (HOD, Monitoring)
- Makeup class requests (Scheduler)
- Salary slips ready (Teachers)
- Leave requests (HR)

TECHNICAL NOTES FOR DEVELOPER

User Roles & Permissions Matrix

Feature	Admin	HOD	Teacher	Student	Scheduler	HR	CSR	Monitor
View All Students	✓	✓	Own only	Own only	✓	X	X	X
Manage Teachers	✓	✓	X	X	X	✓	X	X
Mark Attendance	X	X	✓	✓	X	X	X	X
Schedule Classes	✓	✓	X	X	✓	X	X	X
Submit Complaints	X	X	X	✓	X	X	X	✓
View Complaints	✓	✓	X	Own only	✓	X	X	✓
Generate Reports	✓	✓	X	X	X	✓	X	X
Manage Syllabus	✓	✓	✓	X	X	X	X	X
Handle Demos	✓	X	X	X	✓	X	✓	X

Key Database Entities

1. Users (all roles)
2. Students
3. Teachers
4. Classes
5. Attendance
6. Syllabus
7. Progress Records
8. Complaints

9. Demo Requests
 10. Leave Records
 11. Salary Records
 12. Notifications
-

PRIORITY FEATURES (MVP - PHASE 1)

If building in phases, start with:

1. **User Authentication** - Login for all roles
2. **CSR Demo Module** - Collect demo requests
3. **Scheduler Basic** - Assign teachers to demos/classes
4. **Teacher Portal** - View students, mark attendance
5. **Student Portal** - View schedule, mark attendance
6. **Basic HOD View** - See all students/teachers

PHASE 2 FEATURES

1. Progress tracking
2. Syllabus management
3. Complaint system
4. HR attendance reports

PHASE 3 FEATURES

1. Salary generation
 2. Advanced analytics
 3. Monitoring team module
 4. Full reporting system
-

WIREFRAME PRIORITIES FOR DESIGNER

Start with these screens first:

1. Login page (common for all users)
2. Dashboard (one for each role)
3. Mark Attendance screen (Teacher & Student)

4. Today's Schedule (Scheduler)
5. Student List (Teacher)
6. Demo Request Form (CSR)

Then move to:

7. Complaints submission
 8. Progress tracking
 9. Reports pages
 10. Settings/Admin pages
-

QUESTIONS TO FINALIZE BEFORE DESIGN

1. **Branding:** Do you have a logo/color scheme already?
 2. **Language:** English only or need Urdu support?
 3. **Time Zone:** Should system handle multiple time zones?
 4. **Payment:** Will you integrate payment gateway later?
 5. **Video Integration:** Are classes held on Zoom/Google Meet? Need integration?
 6. **WhatsApp Integration:** Auto-send messages or manual?
-

END OF SPECIFICATION DOCUMENT

This document covers all modules, screens, features, and UI requirements. Share this with your designer to create wireframes and mockups. Let me know if you need any section expanded or clarified!
